Education

J.C. Bose University of Science and Technology, YMCA

2022-2026

B.Tech Electronics and Computer engineering, CGPA: 7.813/10

Faridabad Haryana

Projects

Dexlify [🌐](#) | [git](#) | *React js, Tailwind, Shadcn, Javascript, Zustand, MongoDB, Vite, Node js, Python(Open AI)*

- Built a multi-tool developer suite with features like JSON Formatter, Code Explainer, Snippet Vault, API Tester, Markdown Editor, and more.
- **Frontend** : Used ReactJs and Vite to develop a high-performance interface with fast loading and modular structure.
- Created a responsive and intuitive user interface using ShadCN. Also by customising some of its component by need.
- **Authentication and State Management**: Implemented secure user authentication via JWT and managed global state efficiently using Zustand.
- **Deploying**: Successfully launched the website with a growing user base. Received positive feedback for the interface design and usability.

Serve-Sync [🌐](#) | [git](#) | *HTML, CSS, JavaScript, Node.js, MongoDB*

- Built a full-stack web application that allows users to synchronize and manage service requests efficiently. Focused on backend logic and seamless frontend interaction.
- **UI**: Designed responsive layouts using HTML and CSS with dynamic interaction through JavaScript to ensure a user-friendly experience.
- **Backend**: Implemented RESTful APIs using Node.js to handle user requests, data validation, and business logic.
- **Database Integration**: Integrated MongoDB for storing user information and service request data with secure access control.

Freelance Project

TyreFusion [🌐](#) | *Full-Stack Tyre E-Commerce Platform | React js, Node js, Express, MongoDB, Tailwind, Cloudinary, AWS*

- Built a production-ready MERN-based tyre marketplace featuring vehicle-based tyre search, product management, order processing, and a comprehensive admin dashboard.
- Implemented OTP-based authentication using the Resend API, integrated Cloudinary for media management, and developed secure REST APIs with role-based access control.
- Deployed the application on AWS with a custom domain, and enhanced discoverability through technical SEO, Google Analytics, and Google Search Console integration.
- Engineered a responsive, high-performance frontend using React, Vite, and Tailwind CSS, delivering an optimized user experience across desktop and mobile devices.

Working Experience

Technotrendz Solutions Pvt.Ltd.

16 Jun 2025 – 14 Aug 2025

Software Development Trainee

- Contributed to the development and testing of a scalable system architecture to manage concurrent data streams from 5,000 devices using a TCP server.
- Worked on a React.js front-end dashboard along with supporting HTTP/TCP servers to enable bidirectional data flow.
- Implemented logic for remote monitoring and control of devices.
- Supported the final deployment and testing phase of the application on the AWS cloud platform.

Technotrendz Solutions Pvt.Ltd.

12 Jan 2026 – 15 Jul 2026

Software Developer Intern

- Contributed to the end-to-end development of geospatial, survey management, and IoT solutions across web, mobile, cloud, and embedded platforms, working closely with BSNL on survey and field-data management initiatives.
- Led the development and enhancement of a MERN-based GP Survey Management Platform, implementing survey workflows, image and document management, automated Excel report generation, role-based administration, and scalable data storage using MongoDB Atlas.
- Designed and integrated RESTful APIs using Node.js and Express.js, and deployed production applications on AWS EC2 with Nginx, PM2, SSL, and Linux server administration.
- Developed Android applications for RTK/GNSS-based surveying, enabling Bluetooth GNSS integration, real-time location visualization, mapping, and field data collection.
- Worked on ESP32-S3 and STM32 firmware development involving camera systems, sensor interfacing, UART/Wi-Fi communication, image acquisition and optimization, and GNSS/NTRIP-based high-precision positioning.

Technical Skills

Languages: Java, Python, Javascript, Typescript, C/C++, SQL, GIT

Technologies/Frameworks: ReactJS, TailwindCSS, Node.JS, MongoDB, Express, Next js, AWS EC2

Computer Fundamentals: Data structures in java, Algorithms, OOPS, DBMS, Computer Networks
